THE NEW ZERO TURN

THE NEW IKON

We have revised our bestseller from the ground up. You will be amazed.

ROAD HOMOLOGATION KIT

Municipal users need road homologation approval. Now available for the ZENITH and ZENITH E.

NEW ZT MODEL YEAR '25

Our ZT product portfolio 2025 has been completely renewed. See the new dynamics in the details.

Last year, the Ariens Company celebrated its 90th anniversary. Our family business has been manufacturing high-quality lawn and garden maintenance equipment since 1933. We are the global market leader in the two-stage snow blower segment. Anniversaries are a great opportunity to pause for a moment and reflect. To remember the difficult beginnings, the hard work and strenuous progress and the goals we have achieved. „So far so good“ is what they say in the US.

Immediately after looking back at the past, we are now facing the future. We have taken the anniversary year as an opportunity to revise our entire range of zero-turn mowers with combustion engines. The crowning highlight is our presentation of the completely newly developed Ariens IKON. As the Ariens bestseller, it is a particular focus of our interest. In a fantastic team effort, our developers have created a new IKON that will compete at the highest level. All of our experience from over the years have gone into it. The new IKON sets the industry standard in terms of cut quality, durability, quality and manufacturing.

We have succeeded in adapting the new US models for the European market to CE standards in record time. Just one year later, the models are available for AriensCo EMEAA. Compliments to our teams in the US and EMEAA.

We wish you all the best for 2025 – let's get to work!

The new Ariens IKON

The IKON is a professional product – for every private garden owner, regardless of the size of their lawn. But it is also a reliable tool for smaller service providers. It is modelled after its bigger brother, the APEX. The new IKON establishes a new class of machine between private and professional users.

The new Ariens Zero-Turn Models 2025

The new 2025 EDGE, APEX and ZENITH models have a new, dynamic look. In addition to minor technical improvements, the new Ariens ENVY mower deck on the APEX and ZENITH will be the centre of attention.

Road homologation kit

The option of road homologation for the Ariens ZENITH and ZENITH E for use on public roads has been demanded by sales for years. Road homologation conformity is essential for access to municipal users.

THE NEW IKON. **GREATNESS.** THROUGH THE SUM OF THE DETAILS.

The newest and fastest way to mow your lawn. No matter how big your garden is. The new Ariens IKON sets new standards in terms of cutting pattern, comfort and features.

THE NEW ARIENS IKON IS MORE THAN JUST NEW. IT'S NOT JUST DIFFERENT FROM ITS PREDECESSOR. THE NEW IKON OPENS UP A NEW CLASS OF MOWER FOR THE PRIVATE AND SEMI-PROFESSIONAL USER.

AriensCo's 90th anniversary kicked off the revision of the Ariens Ikon family of zero turns - all of the accumulated experience from previous years have been incorporated into this ground-up, complete re-design of the Ariens Ikon.

Our design engineers have looked at every component. Tried and tested components have been retained and everything else has been revised, improved or renewed.

THE RESULT OF THIS ENDEAVOUR FILLS US WITH REAL PRIDE AND IS CAUSING A STIR IN THE INDUSTRY.

The new Ariens IKON is difficult to categorise. It blurs the line between a mower for private users and a professional mower. The industry leading design and performance will set it apart from the rest.

Discover it – for yourself!

Perfect cut

High comfort

Durable

Dynamic design

90 YEARS

ARIENS
A FAMILY BUSINESS
SINCE 1933

THE BASIS: A SOLID FOUNDATION.

STABILITY AND DURABILITY:

As with the professional series, the IKON has a fully welded tubular frame.

**POWER RESERVES AND RELIABILITY**

The Kawasaki® FR engine series on the IKON is the top benchmark in its class. It delivers the power and performance needed in the toughest conditions.

**CAREFREE WHEEL DRIVE:**

The two separate hydrostatic EZT® wheel motors from HYDRO-GEAR® are service-free and guarantee a smooth driving experience.

**WHAT GOOD IS A MOWER IF IT DOESN'T MOW?**

The new Ariens ENVY™ mower deck has it all. We have put all our experience into its new design.

- **Durability:** 2.9 mm sheet steel, solid edge protection, fully welded.
- **Constant high quality of cut:** 4-point suspension for permanent fixation and parallelism.
- **Robust 3-blade cutting system:** Blade spindles made of forged aluminium. Cooler running and more impact and vibration resistant than cast spindles.
- **Optimised airflow:** The Ariens ENVY™ mower deck has an optimised airflow thanks to new baffles and an improved discharge. Essential for its excellent cutting pattern.

- **Three caged anti-scalp wheels:** The integrated anti-scalp wheels prevent damage to the lawn and the machine in the event of ground contact.
- **Ariens CBT-System:** The Ariens CBT (Constant Belt Tension) system was previously only available on commercial models. It keeps the belt tension constant, compensates for wear and tear and prevents stalling blades under high loads.

ALL THIS FOR THE PERFECT LAWN CUT.

THE EXTRAS: A LOAD OF COMFORT.

SEATING COMFORT

An extra high backrest supports the back. The raised seat base makes it easier to stand up and sit down. Folding armrests relieve pressure on the shoulders. Imitation leather upholstery with decorative stitching.

**FOOT-OPERATED DECK ADJUSTMENT**

Stability has its weight. The solid mower deck is simply lifted by foot pedal while seated. Also available with optional spring support on request.

**ERGONOMIC AND ADJUSTABLE CONTROL LEVERS**

The new Ariens drive levers allow precise, tool-free adjustment of the drive levers in all four directions.

**EXTRA LARGE WHEELS**

20" wheels ensure high suspension comfort, strong traction and low ground pressure. They also make it easier to drive over edges. Recommended tyre pressure: 0.6 – 0.75 bar.

**INTEGRATED AND INTUITIVE BRAKE**

The parking brake is activated by simply folding out the drive levers.

**CHARGING AND STOWING**

Drinks and mobile phones can be stored in the practical storage box. Two USB charging sockets are standard (USB-A and USB-C).

**CUTTING HEIGHT ADJUSTMENT**

A magnetic bolt allows you to conveniently select one of the 13 cutting heights from a seated position.

**DUAL LED FRONT LIGHTS**

Standard, integrated, super-bright front lights with 600 lumens show the way.

PRACTICAL AND CUSTOMISED ACCESSORIES

**MULCH KIT**

When using the mulching kit, there is no side discharge. The mulch baffles keep the cuttings in the mower deck for longer and the special mulching blades shred them into fine particles.

42": 71802100
52": 71802100

**IKON FLOOR MAT**

This rubber mat not only enhances the appearance of your zero turner, but also dampens vibrations on the feet and legs.

71801400

**TRAILER COUPLING**

Pull a practical garden trailer.

71801300

**MOWER DECK TRANSPORT LOCK**

During regular transport, this metal lever fixes the mower deck in the highest position (transport position) and prevents it from swinging up and down.

71800600

**SUPPORT SPRING FOR HEIGHT ADJUSTMENT**

If required, the additional coil spring supports the cutting height adjustment by foot pedal.

71801600

**SIDE GUARD FOR MOWER DECK**

Protects the mower deck and objects in the event of accidental contact.

71516400

**STRIP KIT**

Would you like to have stripes on your pitch like in an English football stadium? This kit makes it possible.

71800500

**COVERING BONNET**

Protects your mower from dirt and moisture.

71515200

GET OUT OF THE LEGAL GREY ZONE **AND INTO PUBLIC TRAFFIC.**

See and be seen safely with the new Ariens road homologation lighting kit.

The municipal use of lawn tractors and zero-turns requires the use of road homologated equipment when switching between mowing areas and when using public paths and roads. Otherwise, the machine must be loaded and may not be moved on its own axle.

THE MAIN ELEMENTS OF THE ARIENS ROAD HOMOLOGATION LIGHTING KIT ARE:

- Operating and control unit in the driver's field of vision, on the control lever
- Full lighting system at the front and rear with ECE labelling
- Front and rear indicators
- Licence plate holder
- Licence plate lighting
- Speed sign
- Warning light
- Reflectors
- Horn

MODEL AVAILABILITY:

The road homologation kit is available for the Ariens ZENITH and ZENITH E model series.

INSTALLATION / RETROFITTING:

The road homologation lighting system is retrofitted by a specialist dealer. The installation time is approx. 5 hours. The road kit is not offered as standard.

AUTHORISATION IN GERMANY:

An official TÜV approval and the sample certificate make it easier for the dealer to carry out the inspection at the local MoT test centre.

AUTHORISATION IN EUROPE:

In Europe, each country issues its own national road traffic regulations and laws. The ECE labelling of the Ariens road lighting kit is accepted in every European country.

Road safety can then also be guaranteed in other countries through individual approval.

THE NEW LOOK OF THE ARIENS ZT FAMILY BRINGS NEW VIGOUR TO EVERY LAWN.

THE ARIENS EDGE SERIES:

SMALLER LAWNS ALSO DESERVE GREAT PERFORMANCE.

Comfort, durability and the speed of a zero-turn mower in a handy, compact design.

THE ARIENS APEX SERIES:

BUILT TO MOW LARGE AREAS.

Robust, durable quality and outstanding cutting performance. Service providers and owners of large lawns will find it the perfect mower.

THE ARIENS ZENITH SERIES:

TESTED BY PROFESSIONALS IN DAILY USE.

Extra comfort has never hurt a professional user. The ZENITH has special suspension comfort for long mowing sessions.

90 YEARS

ARIENS -
A FAMILY BUSINESS SINCE 1933

EDGE SERIES

CUTTING HEIGHT ADJUSTMENT

7-position cutting height
adjustment via foot pedal.

VERY GOOD QUALITY OF CUT

Welded mowing deck of the EDGE 42" with two blades. Optional mulching kit.

GOOD SEATING COMFORT

Comfortable seat with
back cut-out, adjustable.

THE NEW ZEROTURNER MODEL YEAR 2025

APEX SERIES

ZENITH SERIES

CUSTOM MADE MOWER DECK

The new ENVY™ mower deck has improved air flow and an enlarged discharge. Lying grass is lifted higher and cut perfectly. Standard in the course of the 2025 season on APEX and ZENITH.

SOLID MECHANICS

15-stage cutting height adjustment via foot pedal and magnetic plug.

THE MACHINE AT YOUR FINGERTIPS

The new drive lever handles fit better in the hand and are ergonomically shaped.

ROAD HOMOLOGATION LIGHTING KIT

A new lighting kit is available for use on public roads. Installation by specialised dealers.

PREMIUM ENGINE

Kawasaki currently has the best reputation for gasoline engines. A professional FX730V engine with double filter performs reliable work for many years.
